

## Monitor | B6 series High Resolution

# Extreme resolution

On **B6 High resolution monitors** every detail comes out in its full glory. Conceived to satisfy even the most demanding users, such as graphic designers or photo enthusiasts, these monitors offer extraordinary visuals, extreme resolution and exceptional ergonomics.

Furthermore, featuring panels with wide viewing angle technology they present clear, vivid images from each side. **Acer B6 High resolution monitors** come in 4 large form factors: 27", 28", 29" and 32", giving users more screen space to see more content and do more.

- Extreme resolution, from WQHD (2560 x 1440) to Ultra HD (4K2K)
- Ultra-wide aspect ratio (B276HK) for superior multitasking
- Stunning images from every side via 178° Wide Viewing Angle
- Support for landscape and portrait modes
- Advanced colour technologies for superior image quality for stunning images

## Breathtaking visuals

Acer B6 High resolution monitors offer unmatched picture quality via extreme high-resolution display, starting from WQHD (2560x1440) and up to Ultra HD (4K2K), that is four times Full HD resolution. Large form factors give users plenty of space for multiple applications and files, enhancing efficiency and productivity. The series also include an ultra-wide model, the B276HK. With a 21:9 aspect ratio it offers a larger screen area and makes a great alternative to multi-monitor configurations.

## Maximum colour accuracy

Specifically designed for demanding users, Acer B6 High resolution monitors feature Acer ColorPlus, a set of technologies that ensures real and consistent colour output in addition to sharper and clearer visuals. Built-in 100% RGB or sRGB colour correction technology delivers high colour accuracy and colour space reproduction. A low Delta E value ensures accurate and consistent colour, which substantially improves display quality. A 6-axis colour independent adjustment permits precise colour and saturation control for customized settings. In furthermore, extreme Black Monitor helps to deliver image details with deeper black levels, while the super sharpness technology optimizes lower resolution images improving their quality on a higher resolution monitor.

## Superior usability

To prevent eyestrain, Acer B6 High resolution monitors are equipped with Low Dimming technology that reduces the display brightness in dark environments. Furthermore, they come with Acer Ergo-Stand that supports tilt, pivot, swivel and height adjustments, allowing users to fine-tune the viewing position to their needs.

B6 High resolution monitors can be used either in landscape or portrait mode, providing an excellent choice for the digital signage market.

## Extensive connectivity

Acer B6 High resolution monitors come with a rich stock of ports, including DVI, DisplayPort™, MHL and USB 3.0 to seamlessly connect many types of devices. These monitors can be used to set up multiple displays configurations with daisy chain through video ports. The Picture in Picture feature allows better collaboration and productivity by joining two system to a B6 monitor to share the same ultra-resolution working area.

## Eco-conscious design

Acer monitors are mercury-free and use PCR (post-consumer recycled) ABS plastic, plus reusable packaging materials. The adoption of white LED backlight technology provides excellent performance and power savings. Acer monitors meet ENERGY STAR® specifications, are RoHS and TCO Certified, and have earned the respected EPEAT® Gold ranking, demonstrating our care for the planet.
