

## Monitor | V6 series

# Comfortable viewing

**Acer V6 monitors** deliver vibrant visuals and comfortable viewing. They are a great choice for corporate and professional users in search of reliable displays offering excellent performance and visual experience. The latest LED technology, high quality IPS and VA Wide Viewing Angle panels, and plenty of ports merge in **Acer V6 monitors**, to boost productivity in the office or at home delivering a superb user experience.

These models come in 8 form factors: 17", 18.5", 19", 19.5", 21.5", 22", 24", and 27".

- Non-glare IPS and VA Wide Viewing angle panels
- Effortless tilt adjustment for more comfortable use
- Acer ComfyView display with Acer eColor technology
- Extensive connectivity
- Earth-friendly: recycled plastic, LED backlight, Acer EcoDisplay

### *Modern style*

With a contemporary look and thin body, **V6 displays** can blend in any environment. The convenient tilt design lets users set the best viewing angle between  $-5^{\circ}$  and  $25^{\circ}$  to suit any need and work comfortably all day long. IPS and VA Wide Viewing Angle panels preserve image quality and colour accuracy from every angle up to  $178^{\circ}$ , improving collaboration and content sharing.

**V6 series displays** are also wall-mountable. The monitor can be easily discharged from the stand by pressing the Quick Release button on the back of the screen. Furthermore, a magnetic area on the base can hold paper clips and other stationery, perfect to keep your desk tidy.

### *Sharp visuals*

On the **V6 displays** users can enjoy sharp visuals with well-defined detail. They feature Acer eColor Management technology that optimises image performance in common usage scenarios, and Acer ComfyView that reduces the reflection of ambient light to deliver vivid colours and less glare for the best viewing experience. They also come with a very high contrast ratio, improving gradation and detail for extremely clear images. The fast 5ms response time seamlessly delivers even the quickest moving scenes.

### *Digital connectivity*

**V6 series displays** provide an assortment of ports, including traditional DVI/VGA, DisplayPort and MHL\*, so that users can connect many types of devices and be more productive and efficient.

### *Eco-conscious design*

Acer monitors are mercury-free and use PCR (post-consumer recycled) ABS plastic, plus reusable packaging materials. The adoption of white LED backlight technology provides excellent performance and power savings.

Acer monitors meet ENERGY STAR® specifications, are RoHS and TCO Certified, and have earned the respected EPEAT® Gold ranking, demonstrating our care for the planet.

\*Available on V276HL model.
