

Veriton | Z series

All-in-One Business PC

Optimised to help organizations meet their business objectives, the **Acer Veriton Z series** is an All-in-One desktop range that delivers great computing performance in a space saving, extremely flexible design.

The **Veriton Z series** is available in two form factors: Z4810G (23") and (19.5").

- Optional ErgoStand to enable more adjustment options
- Meets productivity and business needs in a slim form factor
- TPM 1.2 support for platform integrity, disk encryption and password protection
- 180° Rotating Webcam

Built for business  Windows 8 Pro

Flexible, space saving design

The **Veriton Z series** excels in flexibility and adaptability, and can seamlessly integrate in any space. The standard base makes tilting easy, increasing efficiency. For more adjustment options, such as height, swivel, pivot and tilt, they can be teamed up with the optional ErgoStand, taking full advantage of ergonomics and easing collaboration and interaction. To maximize visibility these desktops can also be wall mounted.

Adjustable, full HD webcam

Organizations that make frequent use of the webcam in their activities will appreciate the 2.0 MP Full HD rotating webcam. When pointed towards the user it enables vivid conference calls and video-chats; with a 180° rotation it can be directed towards a customer to quickly take a snapshot for registration purposes. On the Veriton Z4810G it can be stowed away when not in use. Users can also log-on to the PC and most used websites via webcam and YouCam software, saving the effort on password management and providing safer access.

Optimal performance

Latest generation processors with integrated graphics and up to 16 GB of memory can smoothly handle office workloads and help drive business efficiency. The ample displays offer a rich viewing experience and allow placing documents side by side to work more comfortably, plus they can be set at the most suitable angle to avoid strain on the eyes.

High-level security

To help companies protect their assets, the **Veriton Z series** comes with a suite of tools conceived to thoroughly defend valuable data, including Acer ProShield. TPM-based data encryption complies with corporate level security requirements, protecting critical information. Acer Office Manager allows easy management and maintenance tasks even without dedicated IT staff.

Warranty extension program

Acer Veriton desktops come with standard Warranty** which can be extended up to 5 years of coverage with the Acer Advantage program that provides a priority repair service. Users can also choose to have on-site repair with the next business day service.
