

# How to Clean Your Acer Products

## Precautions

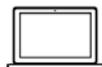

- Do not clean your product while the system is powered on. Make sure to disconnect your product from any power source and remove all external devices and cables.
- Do not use aerosol sprays, bleaches, or abrasive cleaners.
- Do not use any liquid that contains acetone, toluene, ethyl acid, ammonia, or methyl chloride.
- Do not spray cleaner directly onto the LCD panel, and ensure that the LCD panel is dry before closing the lid.

## General Tips

- Use only a soft, lint-free cloth to wipe down your product. Avoid using abrasive materials such as abrasive cloths, towels, paper towels, or similar materials.
- Gently wipe your product to clean it. Do not use excessive force or pressure which may cause permanent damage to the product.

## Cleaning the LCD

- Spray 70-75% isopropyl alcohol onto a lint-free cloth.
- Gently wipe the LCD panel.
- If any marks remain, gently wipe a dry cloth in the same direction moving from the top of the LCD panel to the bottom.

## Cleaning the LCD Cover, LCD Bezel, Top Cover, and Lower Cover

- Spray 70-75% isopropyl alcohol onto a lint-free cloth.
- Gently wipe the LCD cover, LCD bezel, top cover, and lower cover.
- If any marks remain, moisten the cloth with a neutral cleaner and wipe the dirty areas.

## Cleaning the Keyboard

**Note:** Make sure you are in an outdoor or well-ventilated area when using compressed air to remove debris.

- Use a small vacuum with a brush to clean the keyboard of debris.
- You can also use a can of compressed air to blow away any particles that are stuck in between keys.

## Cleaning the Cooling Vents

**Note:** The cooling vents allow hot air to flow out of the product to keep it cool. Cooling vents may be located on the side, back, and/or bottom of the product. Make sure you are in an outdoor or well-ventilated area when using compressed air to remove debris.

- Use a small vacuum to remove dust or debris that has accumulated in the vents.
- You can also use a can of compressed air to blow out the vents.

## Cleaning the I/O Ports

**Note:** Make sure you are in an outdoor or well-ventilated area when using compressed air to remove debris.

- Use a small vacuum or a can of compressed air to remove any debris that may have accumulated in or around the I/O ports.
